

OPERATIONAL PROGRAMME COMPETITIVENESS – ENTREPRENEURSHIP – INNOVATION (ΕΡΑνεΚ)

KA 16147: Design and development of an automatic detection system for epidemic outbreaks and assessment of personalized infection risk of viral hepatitis B and C and HIV infection

HIPPOCRATES EPIDEMIC DETECTION SYSTEM

Call Agenda

The aims of this first TC will be:

- To introduce ourselves
- To clarify the role of the advisory committee
- To inform the members of the advisory committee for the aims of the project and the so far progression
- To present and discuss two of the project's deliverables:
 1. Report on existing methods for epidemic outbreaks detection
 2. Protocol of Hepatitis and HIV medical care in OKANA services

To facilitate our discussion, an extended synopsis of these deliverables will be prepared in English and send to you well before TC.

- Discuss future steps/organize next TC.
- Other topics/issues
